PROFESSIONAL SUMMARY

Data analyst with 3+ years of hands-on experience through coursework and projects building statistical models, developing interactive dashboards, and translating complex data into consequential recommendations for stakeholders. Skilled in Python, SQL, R, and AI-assisted analytics tools for data exploration and workflow automation, with applied experience across healthcare analytics, people analytics, and operational strategy.

EDUCATION

University of California, Riverside

Sep 2022 - Jun 2026

B.S. in Statistics, Minor in Information Systems

Relevant Coursework: Business Analytics, Database Systems, Decision Analysis, Design of Experiments, GIS for Business Applications, Generalized Linear Models, Regression Analysis, Sampling Surveys, Statistical Computing with SAS and R, Statistical Inference, Systems Analysis and Design

EXPERIENCE

SQL & Database Architecture Extern

Aug 2026 - Current

Breaking Games/Extern

- Designing and building a relational analytics database from six raw e-commerce CSV files, structuring dimension, fact, and summary tables connected via primary and foreign keys.
- Writing SQL queries to trace the customer journey from first ad click to purchase, rank the product catalog by revenue contribution, and build restock recommendations.
- Cleaning and standardizing hundreds of messy marketing traffic sources into unified channels, then investigating thousands of abandoned carts to identify bot-driven activity and calculate true marketing ROI and cart abandonment rates.
- Collaborating with Claude throughout the project: briefing context, iterating on queries, and cross-checking results while building a shareable HTML dashboard to present data-backed recommendations.

People Analytics / Operational Strategy Extern

Mar 2026 - May 2026

Amazon/Extern

- Analyzed 200-300 Glassdoor reviews and 30 YouTube videos to surface recurring workplace pain points at Amazon Fulfillment Centers, applying thematic analysis and root-cause thinking to turn unstructured data into actionable insights.
- Cleaned and processed unstructured text data using Python, NLTK, and TextBlob to support people analytics workflows.
- Developed a persona-based recommendation to improve the associate experience and employee retention rates, using insight synthesis and storytelling to design a practical team-led solution for a simulated business scenario.

Healthcare Data Analytics Extern

Jan 2026 - Mar 2026

TruBridge/Extern

- Applied Difference-in-Differences modeling in Python across all 58 California counties to analyze Medi-Cal policy changes, identifying increased diagnosis rates in rural populations.
- Identified evidence of diagnostic unmasking, demonstrating that spikes in county-level disease prevalence reflected improved medical detection rather than worsening public health outcomes.
- Built an interactive browser-based dashboard using Chart.js and vanilla JavaScript, with data processed via Python and pandas, to visualize 11 statistical charts and guide stakeholder resource allocation.

Sponsorship Lead, Operations Committee

Feb 2024 - Jun 2025

UC Riverside Citrus & Cutie Hack

- Secured 12 corporate sponsors, providing funding and in-kind resources for a 400+ participant university hackathon.
 - Designed a multi-tier sponsorship proposal and led outreach to 600+ companies to drive partner engagement.
 - Managed day-of event operations, resolving real-time challenges to ensure a smooth experience for attendees and sponsors.
-

SKILLS

Programming & Tools: R, SQL, Python, Microsoft Excel, Microsoft Power BI, SAS, ArcGIS, Prompt Engineering

Statistical & Data Analysis: Regression Modeling, Generalized Linear Models, ANOVA, Hypothesis Testing, Exploratory Data Analysis, Data Cleaning, Model Evaluation, Survey Sampling & Inference

AI Tools: Claude, ChatGPT, GitHub, GitHub Copilot, Microsoft Copilot, Gemini, Perplexity

Business & Communication: Data Storytelling, Stakeholder Reporting, Operations Management, Sponsorship Strategy
